

I Choose Us

Familiarity can be a blessing and a curse
And sometimes it seems your greatest love can be your worst

I knew that it would not be easy
I only hoped it wouldn't be this hard

**(Chorus) I choose to love you
Choose to know you and embrace
Every part of you
I choose to want you
Choose to trust you always
With all my heart
I choose us**

Familiarity I have heard breeds contempt
But we can be free if we will love and repent

I know the darkest part of evening
Is just before the dawn

**(Chorus) I choose to love you
Choose to know you and embrace
Every part of you
I choose to want you
Choose to trust you always
With all my heart
I choose us**

(Bridge) Sometimes when we argue I am overwhelmed
When it seems we'll never make amends
I call on the grace of God from Heaven's realm
And find myself loving you again

**(Chorus) I choose to love you
Choose to know you and embrace
Every part of you
I choose to want you
Choose to trust you always
With all my heart
I choose us**

I choose us...
I choose us...
