

Leaving It All Behind

This is my story This is my song
A life of glory Long gone
So much to offer With talent graced
Upon the altar It's all placed

Cause all that really matters is that I love you Father and You are pleased
For all that this world offers is nothing next to eternity

(Chorus) So I'm leaving it all behind The places that I've been
The life that I have known For I am not my own
So I'm leaving it all behind Releasing all my past
Pressing toward what lasts Reaching for the prize
I will leave it all behind

And I remember The nights so dark
I bid sin enter In my heart
I had forsaken The Truth I'd known
But I repented And came back home

Cause all that really matters is that I love you Father and You are pleased
For all that this world offers is nothing next to eternity

(Chorus) So I'm leaving it all behind The places that I've been
The life that I have known For I am not my own
So I'm leaving it all behind Releasing all my past
Pressing toward what lasts Reaching for the prize
I will leave it all behind

(Bridge)

My life is all for You You're all I want You're everything I need
And I perform for an audience of One It's You I long to please
I lay aside every weight that holds me back from running straight to You
For I was born to know You and to love you and obey You in all I do

(Chorus) So I'm leaving it all behind The places that I've been
The life that I have known For I am not my own
So I'm leaving it all behind Releasing all my past
Pressing toward what lasts Reaching for the prize
I will leave it all behind
